

Benkleman Beam Apparatus, UMI-537B

The light weight instrument is supplied in two parts for assembling on site with easy hand tools. In use one end of the beam rests at a point under investigation while the beam is pivoted at the centre. The free end carries a dial gauge to record the deflections. The other end is 2:1 which magnifies even small deflections. Supplied with a dial gauge 0.01 X 25mm. This is a light weight dismantle able instrument and easy to carry.
