

Moisture Meter Hydrometer, UMI-531

Moisture Meter Hydrometer

- 2 in 1 Hydroponic Plants Soil Moisture and pH Meter is good for agriculture soil testing.
- Lightweight and portable. Suitable for indoor and outdoor use, ideal soil test tool kit for home, garden, lawn and farm, help you become an excellent garden master.
- Scientifically Accurate, Easy to read moisture and pH levels of water in the Soil, promotes healthy plants.
- Moisture readings on a scale of 0 (dry) to 10 (wet) and pH readings between pH 3.5(acidic) and pH 8 (alkaline) are represented.
- IMPORTANT TIPS- 1. Please do not touch the stone or hard rock soil, if the soil is too hard and dry it will damage the probes; 2. Designed for testing soil only not for any other liquid test or to put directly into the water, otherwise the electrode will get damaged. 3. After using, Please clean and wipe the probes. If you have any problems, contact us freely and we will provide support with our customer service.
